PATIENT CAPITAL MANAGEMENT INC. & CANSO INVESTMENT COUNSEL LTD.

This interim management report of fund performance contains financial highlights but does not contain either interim or annual financial statements of the Pool. If you have not received a copy of the interim financial statements with this interim management report of fund performance, you may obtain a copy at your request, and at no cost, by calling toll-free at 1-866-323-4235, by writing to us at 300-175 Hargrave Street, R3C 3R8, by visiting our website at www.valuepartnersinvestments.ca or by visiting the SEDAR website at www.sedar.com. You may also contact us using one of these methods to request a copy of the Pool's interim financial report, proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

Interim Management Discussion of Fund Performance

August 20, 2019

The Interim Management Report of Fund Performance presents management's view of the significant factors and developments affecting the Pool's performance and outlook since December 31, 2018, the Pool's most recent fiscal year-end. This report should be read in conjunction with the Annual Management Report of Fund Performance for the year ended December 31, 2018.

Results of Operations

Net assets of the Pool increased by approximately \$36.6 million for the six-month period ended June 30, 2019. Contributing to this increase was \$12.8 million of net sales to unitholders and a \$30.0 million increase in net assets from operations, offset by \$6.2 million of distributions paid to unitholders. The increase in net assets from operations was due to \$15.5 million of unrealized appreciation in value of investments and forward currency contracts, dividend and interest income of \$15.5 million and \$7.5 million of net realized gains on the sale of investments. This was offset by a net realized loss of \$0.8 million on forward currency contracts and \$7.7 million of management fees and operating expenses.

The following table shows the changes to the allocation of the overall portfolio during the period:

Sector	Allocation Increase	Sector	Allocation Decrease
Equities	4.8%	Corporate bonds	6.9%
Cash	2.1%	Mortgage Backed Securities	1.0%
Other Net Assets	1.0%		

The most significant shift was in the equity securities of the portfolio, which increased by 4.8%. Patient Capital increased the overall equity position of the Pool to take advantage of buying opportunities.

There were also several changes made to the Pool's equity holdings during the period. The following table summarizes the businesses that were added and/or removed from the portfolio:

<i>Additions</i>	<i>Dispositions</i>
CVS Health Corporation	Verizon Communications

Cash flows into the Pool from new unitholders as well as proceeds from the disposition of fixed income securities allowed the Portfolio Manager to make the above equity addition. It also allowed them to add to existing positions that they believed were attractively valued for further investment.

As a result of these changes, there were some notable shifts in the sector allocation of securities from the beginning of the year as indicated in the following table:

<i>Sector</i>	<i>Allocation Increase</i>	<i>Sector</i>	<i>Allocation Decrease</i>
Healthcare, Equipment & Services	2.9%	Corporate bonds	6.9%
Banks	2.1%	Telecommunication Services	3.2%
Cash	2.1%	Mortgage-backed Securities	1.0%
Automobiles & Components	1.5%	Retailing	0.1%
Other Net Assets	1.0%		
Real Estate	0.7%		
Diversified Financials	0.4%		
Energy	0.2%		
Media	0.2%		
Utilities	0.1%		

Results of Operations (continued)

The portfolio has also changed from a geographic standpoint during the period as indicated by the most significant changes shown in the following table:

Country	Allocation Increase	Country	Allocation Decrease
Italy	1.0%	Netherlands	0.9%
Canada	0.8%	United States	0.7%
Japan	0.8%	Germany	0.4%
		Jersey	0.3%
		Great Britain	0.2%
		France	0.1%

Each series of the Pool experienced returns in the range of 3.6% to 4.8% for the period as compared to an 11.4% return of the blended index (comprised of 50% S&P/TSX Composite Total Return Index and 50% FTSE TMX Universe Bond Index). The Pool underperformed the blended index due to its asset mix which was weighted more in fixed income relative to the benchmark. During the period, the Pool's asset mix was approximately 55-60% fixed income and 40-45% equities. The equity component of the Pool lagged the S&P/TSX Composite Total Return Index due to its holdings in the energy and U.S. retail sectors. In addition, the fixed income holdings underperformed the FTSE TMX Universe Bond Index as the portfolio had a lower duration than the index. This lower duration hurt relative fixed income performance during the first half of 2019 as interest rates declined. The appreciation of the Canadian dollar relative to the U.S. dollar decreased increased the value of the Pool's U.S. holdings (in Canadian dollar terms).

Revenues and Expenses

Revenues of the Pool amounted to \$15.5 million, which can be attributed to a combination of dividend income from its equity holdings and interest income from its fixed income holdings. Interest income increased by approximately \$1.6 million and dividend income increased by \$2.4 million as more equity securities were added to the portfolio during the period.

The Pool also incurred \$7.7 million in management fees and operating expenses, realized a \$7.5 million gain on the sale of investments and experienced \$15.5 million of unrealized appreciation in the value of its investments and forward currency contracts. The realized gain on sale of investments of \$7.5 million is attributable to the following dispositions in the portfolio during the period. Dividends and interest received from each of these holdings while in the Pool are in addition to these gains.

Holding	Approximate Holding Period	Proceeds (millions)	Cost (millions)	Realized Gain (Loss) (millions)
Verizon Communications	1.8 years	\$ 27.2	\$ 19.9	\$ 7.3
Fixed income securities	n/a	\$ 151.0	\$ 151.0	\$ -
Partial Dispositions	n/a	\$ 78.1	\$ 77.9	\$ 0.2
Canada T-Bills	n/a	\$ 21.2	\$ 21.2	\$ -
		\$ 277.5	\$ 270.0	\$ 7.5

Recent Developments

Economic Conditions

North American equity markets posted positive returns during the first six months of 2019. As of June 30, 2019, the year to-date performance for the S&P/TSX Total Return Index and S&P 500 Total Return Index (C\$) were 16.2% and 13.5% respectively. Both the Canadian and U.S. markets rebounded sharply off the declines experienced in the fourth quarter of 2018. Market sentiment improved during the first six months of 2019 due to the prospect of lower interest rates. Central bankers in Canada and the U.S reversed course on their interest rate outlook as global trade tensions brought on fears of an economic slowdown. The Canadian market responded positively to the resolution of trade disputes with the U.S. and completion of the renegotiated North American Free Trade Agreement. The U.S. market's Canadian dollar returns were negatively impacted by the appreciation of the American dollar relative to the Canadian dollar. A small number of high-tech companies continued to contribute a significant percentage of the S&P 500 total return.

Recent Developments (continued)

The U.S. economy continued to perform well during the first half of 2019. For the twelve months ended March 31, 2019 the economy grew by 3.2%. This growth rate was the highest twelve months showing in four years. There was positive news on the employment front as well, as strong manufacturing and non-manufacturing activity all added to the strong economic growth. In addition, an improving trade deficit helped the American economy. However, the expectation is that growth in the second half will slow down. The impact of last year's tax cuts and a moderation in inventory building may reduce growth to 2%. Optimism has also been tempered by the Trump Administration's imposition of tariffs on China and many of its other trading partners. Geopolitical concerns are also emerging; the relationship with Iran is quickly deteriorating and may lead to strained oil supplies while issues with North Korea remain unresolved. The Canadian economy continued to perform unevenly during the first half of 2019. While employment has been strong economic activity has been somewhat sluggish. The Canadian economy continues to be impacted by the lack of investment in the Canadian oil and gas industry. In addition, China and Canada are experiencing diplomatic difficulties. As a result, China has banned the import of certain agricultural products. On a positive note, NAFTA has been successfully renegotiated and trade disputes with the U.S. have largely been resolved.

The Portfolio Manager views both the U.S. and Canadian equity markets in general, as overvalued and posing a significant amount of risk. The Portfolio Manager believes that valuation parameters are at high levels and that the risk of a significant correction is high. The energy and U.S. retail sectors continue to show value.

The Portfolio Manager views long-term government bonds as risky in today's environment. With global interest rates at all-time lows the risk of capital loss in fixed income markets is quite high. In addition, investors are not being appropriately compensated for taking credit risk as interest rates on non-investment grade bonds are at very low levels.

The VPI Income Pool holds a fixed income weighting of approximately fifty-five per cent and is well positioned to take advantage of any opportunities that may arise. Over the long term, the Portfolio Managers' focus on purchasing quality companies with sustainable dividends and income at attractive valuations will hold the Pool in good stead. The Portfolio Managers' continue to diligently search for excellent long-term opportunities that meet their criteria for value and quality.

Series B

Effective August 15, 2019, the Pool has discontinued sales of Series B units and, by the end of the calendar year, all Series B units will be switched to Series A units, which have a lower management expense ratio. There will be no costs to unitholders as a result of this change.

Past Performance

The historical performance information shown below assumes that all distributions were reinvested in the Pool and does not account for any sales, redemptions, distributions or optional charges or income taxes payable by an investor that would have reduced returns. Mutual fund returns are not guaranteed, their values change frequently, and past performance may not be repeated.

Year-by-Year Returns

The bar charts below show the performance of each series of the Pool (net of fees) for the six-month period ended June 30, 2019, and the previous years ended December 31 or since inception to December 31. It shows in percentage terms, how an investment made on January 1 or on inception would have increased or decreased by the end of the respective periods.

- (1) Patient Capital Management Inc. and Canso Investment Counsel Ltd. were appointed as portfolio managers of the Pool on December 1, 2013.
- (2) 2017 return is since inception on July 5, 2017

INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE

For the six-month period ended June 30, 2019

VPI INCOME POOL

Management Fees

The Pool pays an annual management fee on each of its series (excluding Series O) to Value Partners Investments Inc. (“the Manager”). The management fee is calculated daily as a percentage of the net asset value of each series as of the close of business on each business day. In consideration for the management fees, the Manager may pay a percentage sales commission and/or trailing commission to registered dealers or brokers for units bought and held in the Pool depending on which series of units were purchased. The Manager also pays a portion of the management fee to the Portfolio Managers for their services in managing the investment portfolio.

For the six-months ended June 30, 2019, approximately 41% of the management fee revenues received by the Manager from the Pool were paid to registered dealers and brokers as sales and/or trailing commissions. Since each series may have a different commission structure, this percentage may vary by series. For unitholders eligible for the Management Fee Reduction Program, approximately 16% of the gross management fees were returned to unitholders as management fee rebates. The remainder of the management fee revenue, after payment of fees to the Portfolio Manager for its services, was retained by the Manager for corporate purposes.

Related Party Transactions

Value Partners Investments Inc. is the manager of the Pool and is responsible for the overall business and operations of the Pool. For the six-month period ended June 30, 2019, the Pool paid \$6.7 million in management fees (excluding taxes) to the Manager. In addition, the parent company of the Manager also held 94,887 Series F units of the Pool as of June 30, 2019.

Financial Highlights

The following tables show selected key financial information about each series of the Pool and are intended to help you understand the Pool's financial performance for the past five years ended December 31 and the six-month period ended June 30, 2019. *This information is derived from the Pool's audited annual financial statements and interim unaudited financial statements and is not intended to be a reconciliation of the net asset value per unit.*

(1) This information is provided as at the date shown.

(2) Management expense ratio is based on total expenses for the stated period (excluding distributions, commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets during the period. In the period a series is established, the management expense ratio is annualized from the date of inception to December 31.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period.

(4) The Pool's portfolio turnover rate indicates how actively the Pool's portfolio manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Pool buying and selling all of the securities in its portfolio once in the course of the year. The higher the Pool's portfolio turnover rate in a year, the greater the trading costs payable by the Pool in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Pool.

VPI INCOME POOL

Other Information

As at June 30, 2019, Value Partners Group Inc. (VPGI) owns 100 percent of the Manager and Lawton Partners Financial Planning Services Limited (Lawton Partners), a mutual fund dealer. VPGI is 37.4 percent owned by Longton Ltd., whose shareholders include specified members of the Lawton family, including one director/officer of the Manager and one director/officer/sales representative of Lawton Partners. Certain of the directors, officers and shareholders of VPGI are also shareholders and sales representatives of Lawton Partners.

As of June 30, 2019, sales representatives of Lawton Partners hold, in aggregate, Class A1 shares of VPGI representing 17.2 percent of the common equity and Class C1 shares representing 6.2 percent of the common equity. The remaining common equity of VPGI was held by sales representatives of other dealer firms and employees of the Manager. Additional information regarding equity interests may be obtained from the Pool's annual information form or from the Manager's website at www.valuepartnersinvestments.ca.

Forward-Looking Statements

This report may contain forward-looking statements about the Pool, including its strategy, expected performance and condition. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", or negative versions thereof and similar expressions. In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Pool action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Pool and economic factors.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Pool. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events.

We stress that the above-mentioned list of important factors is not exhaustive. We encourage you to consider these and other factors carefully before making any investment decisions and we urge you to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Pool has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise.
